FUNDAMENTALS

# Diego Alvarez

React developer • father • doctor  
Buenos Aires

## Summary

I'm a React developer.

Problem solver by heart and evolved this skill with the years learning algorithms and different programming languages and paradigms.

Always digest problems into fragments in a deterministic and declarative approach.

I love to learn by teaching and doing.

Experience with C/C++, python and JavaScript.

One of my 21' goals is to build my own lib with cool custom components.

Now I am looking to apply my skills more, get senior experience in the field, and try to improve the healthcare industry, developing innovative tools and resources for the daily work of physicians.

I also want to collaborate with startups or any cool project.

Thanks for visiting my profile.

---

## Experience

### VISIVA

Frontend Developer  
January 2021 - Present (7 months)  
Buenos Aires Province, Argentina

Improve UX/UI for clients (Logitech) - SEO - Writing application interface using JavaScript - Experience with debugging and performance testing software.
